

Register of Animal Musculoskeletal Practitioners

Stage 2:

**Recognition of Prior Experiential Learning
Application form**

October 2017

| | | | |
|----------------------------------|---|------------------------|--|
| Applicants Name | | | |
| Home Address | | | |
| | Postcode: | | |
| Profession | | Animals you treat | |
| Registering body (if applicable) | | Area of work (regions) | |
| Applicant declaration | <p>I confirm that all of the evidence submitted is a true reflection of my academic achievements.</p> <p>I confirm that I have not been subject to a Fitness to Practice proceeding or disciplinary proceedings from other educational institutions, regulators or professional bodies</p> <p>I confirm that I am fully insured to practice within my profession.</p> <p>I confirm I shall adhere to the RAMP CPD requirements</p> <p>I enclose a copy of my Public Liability Insurance</p> <p>I enclose a copy of my relevant qualifications</p> <p>I agree to RAMP storing my details, as shown above (details will be used for RAMP purposes only)</p> | | |
| | Signature: | | |
| | Date: | | |

Please note: Your application will be reviewed by the RAMP registration team and it is at their sole discretion whether this application is sufficient or whether the applicant is required to provide any further evidence or undergo further professional development.

RPEL Application Questions

(To be completed by the applicant)

Stage 2: Recognition of prior experiential learning

Instructions for completion

This document must be completed fully if the applicant is applying for acceptance onto the Register using Recognised Prior Experiential Learning.

All questions must be completed and the requested evidence/records and transcripts included within your application.

Once complete, the applicant should complete the mapping document in the second half of this section, referencing where in their answers, cases and accompanying evidence, adherence to each standard is shown. Remember to enclose all relevant documentation that you are providing as evidence.

If any documentation is not in English, applicants are responsible for providing RAMP with a certificated translation of the academic profile transcripts and any course documentation submitted to support the application.

- **Please note that all evidence must be mapped to the criteria laid out in the Stage 2 mapping section of this document by the applicant.**

In this section you should answer all questions:

- Profile of patients and case load
- Description of the applicant's understanding of the impact of legislative documentation on their clinical practice
- Description of how the applicant keeps their professional knowledge and skills up to date
- Description of how the applicant creates, manages and stores clinical notes
- Five case presentations that allow the applicant to demonstrate breadth of practice and competence in relation to RAMP criteria in an evaluative and reflective manner

PLEASE NOTE: Applicants who were accepted via the RPL pathway do not need to complete this application document.

To complete the RPEL aspect of this process you will need to complete the following questions:

1 Profile of the applicant's patients and caseload

This section should include a summary of the patients you have treated over the last 3 months of your practice, This should be a true reflection of your practice including (for example) equine to canine ratio if applicable. Please use the table provided at the end of this question to provide an outline of these patients (Table 1 – Profile of patients and case load).

The following should be considered:

- Animal Type
- Breed
- Age
- Usage
- Presenting complaint(s)

Reflecting upon the information you have provided in the table briefly discuss how you consider that these patients, and their presenting complaints, have helped you to maintain your clinical and professional skills.

If you have any specialised areas of interest or focus, describe what they are and what approximate percentage of your patient load they represent.

Please also consider any areas of your practice that you would like to strengthen and how you might achieve this.

Recommended 250-300 words

Guidance:

RAMP is aiming to gain an insight of: the scope and breadth of your current clinical practice and patient profile; whether you have any areas of specialised focus; and your ability to collect and analyse data about your professional practice.

- You should aim to provide information on 10-20 patient profiles. Please do not include any information which might identify the patient.
- You should only consider patients for whom you had sole responsibility for their management*. If your working environment has been one where you have worked under the guidance of other healthcare professionals, then please describe these circumstances.

*This assumes veterinary permission has already been obtained.

Recommended 250-300 words

Profile of the applicant's patients and caseload summary: (recommended 250-300 words)

| Animal type | Breed | Age | Usage (e.g. agility, dressage, pet, grass roots) | Presenting complaint |
|-------------|-------|-----|--|----------------------|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

| | | | | |

Table 1 - Profile of patients and case load

2 How do you keep your professional knowledge and skills up to date? Please give reference to current research.

Discuss how you feel you have kept your professional knowledge and skills up to date and what initiatives you have undertaken to enhance and monitor the quality of care you provide.

This section should include an evaluation of the principal continuing professional development activities undertaken by the practitioner to maintain and enhance clinical competence and professional skills; their awareness of their own strengths and personal learning needs under each area of the standards; the suitability of their plans for development; awareness of current research and developments in the profession.

Recommended 500-1000 words

Guidance:

RAMP is looking to gain an insight into how you personally keep your clinical and professional skills up to date and how this informs your MSK practice.

You should consider in your response a number of areas:

- Your patient profile (if applicable)
- Continuing professional development activities
- Professional networking with colleagues
- Self-reflection on practice
- Feedback from colleagues and patients
- Case analysis and/or clinical audit
- Research undertaken and/or reflected upon

Recommended 500-1000 words

Criteria fulfilled:

E1-E9 inclusive

F1-4 inclusive

**How do you keep your professional knowledge and skills up to date? Please give reference to current research:
(recommended 500-1000 words)**

3 Write a statement of how you use the Animal Welfare Act (2006) and Veterinary Surgeon’s Act (1966), Veterinary Surgeon’s (Exemptions) Order 2015 in your general practice (include transcripts or examples of documentation you use to achieve this).

Discuss what your understanding of these two acts are and how this applies to you within your role as practitioner. Include any measures you have implemented which allow you to work inline with these and within the law. What are your actions and the protocol you follow if you feel the animal’s welfare is under question.

Recommended 150-200 words

Guidance:

RAMP is looking to gain an insight into your understanding of the Animal Welfare Act (2006) and Veterinary Surgeon’s Act (1966), Veterinary Surgeon’s (Exemptions) Order 2015 and how it applies to you as an animal practitioner within your practice, what measures you implement in order to enable you to work in line with these and within the scope of the law.

You should consider in your response a number of areas:

- Your understanding of the Veterinary Surgeon’s Act (1966) Veterinary Surgeon’s (Exemptions) Order 2015
- Your understanding of how this act applies to you as a practitioner
- Any protocols, environmental and paraprofessional communication procedures you have implemented to ensure that you work within the scope of the law
- Include any documents you use as part of this procedure or an anonymised example this
- Your understanding of the Animal Welfare Act (2006)
- Your understanding of how this act applies to you as a practitioner
- Any protocols, environmental and paraprofessional communication procedures you have implemented to ensure that you work within the guidelines of this Act.

Recommended 150-200 words

Criteria fulfilled:

A3
 A6-A9 inclusive
 B1
 B2
 C1-5iv inclusive
 C5vi

D1-4 inclusive
 D6
 F4
 G3

Write a statement of how you use the animal welfare act (2006) and Veterinary Surgeon's act (1966), Veterinary Surgeon's (Exemptions) Order 2015 in your general practice (include transcripts or examples of documentation you use to achieve this): (recommended 150-200 words)

4 Write a statement of how you will store and use records.

Discuss your process and protocol for creating, storing, using and archiving records, and how you comply with data protection within your practice and communications with paraprofessionals.

Recommended 150-200 words

Guidance:

RAMP are looking to gain an insight into how you create, maintain and store patient records and work inline with data protection requirements .

You should consider in your response a number of areas:

- Creation of records
- Storage of records
- Archiving records
- Where and how you share if required.
- Procedures you adhere to in the above situations
- Your understanding of how this complies with data protection requirements

Recommended 150-200 words

Criteria fulfilled:

C1-4 inclusive

D1-6 inclusive

Write a statement of how you will store and use records: (recommended 150-200 words)

5 i) and ii) Two case presentations which demonstrate the breadth of your musculoskeletal management of patients including treatment and post treatment plan, (one case should include an animal with a co-existing morbidity (neurological, endocrine, visceral or orthopaedic) enclose your anonymised patient records.

5 i) Describe a past case in which a patient presented with musculoskeletal symptoms; the steps you took in managing this case; how you involved the owner in your decision-making and helped them make an informed choice as to their animal's ongoing care.

Recommended 1500-2000 words

i) Guidance:

Please describe in your case presentation:

- The case history including the patient profile, presenting complaint, and relevant medical, family, social and environmental history
- Your assessment of the patient's general health
- The contribution of any physiological, psychological, and social factors that you thought were relevant to the presenting complaint
- Your examination and assessment of the patient's biomechanics and musculoskeletal system
- Your clinical findings
- Your interpretation of the significance of the presenting signs and symptoms
- Your differential diagnostic hypothesis and the conclusion you reached to explain the patient's presenting symptoms
- Your treatment and management plan based upon your working hypothesis, the patient, and the likely effects and/or risks of musculoskeletal treatment
- How you involved the owner in making an informed decision about their animal's ongoing care.

Recommended 1500-2000 words

Criteria Fulfilled

A1-9 inclusive

C2

C5

D1-6 inclusive

E1-8 inclusive

F1-4 inclusive

G1-6 inclusive

H1-3 inclusive

**i) Describe a past case in which a patient presented with musculoskeletal symptoms; the steps you took in managing this case; how you involved the owner in your decision-making and helped them make an informed choice as to their animal's ongoing care:
(recommended 1500-2000 words)**

ii) Describe a past case in which a patient presented with musculoskeletal symptoms and also suffered from a co-existing morbidity (such as a neurological, endocrine, visceral or orthopaedic condition); the steps you took in managing this case; how you involved the owner in your decision-making and helped them make an informed choice as to their ongoing care.

Recommended 1500-2000 words

ii) Guidance:

Please describe in your case presentation:

- The case history including the patient profile, presenting complaint, and relevant medical, family, social and environmental history
- Your assessment of the patient's general health
- The contribution of any physiological, psychological, and social factors that you thought were relevant to the presenting complaint
- Your examination and assessment of the patient's biomechanics and musculoskeletal system
- Your clinical findings
- Your interpretation of the significance of the presenting signs and symptoms
- Your differential diagnostic hypothesis and the conclusion you reached to explain the patient's presenting symptoms
- The impact the co-existing morbidity had on your working hypothesis and subsequent treatment or referral.
- Whether the case was:
 - Suitable for treatment, and if so your treatment and management plan based upon your working hypothesis, the patient, and the likely effects and/or risks of musculoskeletal treatment
 - Not suitable for treatment and what steps you took to ensure ongoing care for the patient, whether this included referral to a more appropriate authority and what the outcome was, if known.
- How you involved the owner in making an informed decision about their animal's ongoing care.

Recommended 1500-2000 words

Criteria fulfilled:

A1-9 inclusive

C1

C2

C5

**ii) Describe a past case in which a patient presented with musculoskeletal symptoms and also suffered from a co-existing morbidity (such as a neurological, endocrine, visceral or orthopaedic condition); the steps you took in managing this case; how you involved this patient in your decision-making and helped them make an informed choice as to their ongoing care:
(recommended 1500-2000 words)**

6 Case presentation in which you concluded that certain techniques were unsuitable (contra-indicated).

Describe your most recent case in which you concluded, after clinical evaluation, that although the patient was suitable for treatment a certain technique or techniques should be avoided or were contra-indicated.

Recommended 1500-2000 words

Guidance:

This question is looking to gain an understanding of your ability to identify indications and contraindications to the use of manual techniques. It is also looking to understand how and when you might modify the application of a specific technique as a result.

Please describe:

- The case history including the patient profile, presenting complaint, general health and relevant veterinary, medical, breed history and environmental factors
- Your assessment of the patient’s general health
- Your examination and assessment of the patient’s biomechanics and musculoskeletal system
- Your clinical findings
- Your interpretation of the significance of the presenting signs and symptoms
- Your differential diagnostic hypothesis and the conclusion you reached to explain the patient’s presenting symptoms
- How the case history data and the outcome of your clinical examinations informed this working hypothesis
- Your treatment and management plan based upon your working hypothesis, the patient, and the likely effects of treatment
- Why you decided that a particular technique was contra-indicated
- The techniques you proceeded to use in the treatment given
- Why you chose these techniques, and any modifications you had to make to adapt to the needs of the patient.
- What you told the owner about any material or significant risks associated with the application of this/these specific technique(s) and how you were certain they understood.

**Describe your most recent case in which you concluded, after clinical evaluation, that although the patient was suitable for treatment a certain technique or techniques should be avoided or were contra-indicated:
(recommended 1500-2000 words)**

7 Case presentation involving working with allied professionals.

Describe your most recent case in which you worked with/alongside allied professionals, how you achieved this, the procedures you followed, how you worked together to achieve your aims and the outcome of doing so.

Recommended 1500-2000 words

Guidance:

This question is looking to gain an understanding of your ability to work with allied professionals to deliver the most beneficial and appropriate treatment for the individual. It is also looking to understand how you achieved this including the procedure you followed, how you communicated and worked together to create a treatment and management plan and how you delivered this to reach your intended outcome.

Please describe:

- The case history including the patient profile, presenting complaint, general health and relevant veterinary, medical, breed history and environmental factors
- Your assessment of the patient's general health
- Your examination and assessment of the patient's biomechanics and musculoskeletal system
- Your clinical findings
- Your interpretation of the significance of the presenting signs and symptoms
- Your differential diagnostic hypothesis and the conclusion you reached to explain the patient's presenting symptoms
- How the case history data and the outcome of your clinical examinations informed this working hypothesis
- Your treatment and management plan based upon your working hypothesis, the patient, and the likely effects of treatment
- How you came to the decision that you needed to work with paraprofessionals.
- How you achieved this; what procedures did you follow, how did you communicate and exchange information.
- How you worked to create a treatment/management plan, how did you consolidate and/or organise treatments to give the most effective results, how you worked together to achieve your intended outcome.

Recommended 1500-2000 words

Criteria fulfilled:

A1-9 inclusive
C1-5 inclusive
 D1-6 inclusive
E1-8 inclusive

F1-4 inclusive
G1-6 inclusive
H1-3 inclusive

Describe your most recent case in which you worked with/alongside allied professionals, how you achieved this, the procedures you followed, how you worked together to achieve your aims and the outcome of doing so:

(recommended 1500-2000 words)

8 Case presentations requiring referral of patient back to Veterinary Surgeon. Please attach an anonymised copy of your complete relevant patient record for this case highlighting the mechanism of referral clearly within the patient records (this should include any correspondence).

Describe your most recent case in which, after clinical evaluation, you concluded that the patient should be referred back to the Veterinary Surgeon.
Recommended 1500-2000 words

Guidance:

The purpose of this question is to determine how you came to the conclusion that the patient required referral to the vet; the contribution you felt that they would make to the well-being of the patient; how you involved the owner in this decision and gained their consent to make the referral; the mechanism of the referral; the outcome, if known, and how this informed your ongoing care of the patient.

In answering this question, please consider the following:

- The case history including the patient profile, presenting complaint, general health and relevant veterinary, medical, breed history and environmental factors
- Your assessment of the patient's general health
- The contribution of any physiological, psychological, and social factors that you thought were relevant to the presenting complaint
- Your examination and assessment of the patient's biomechanics and musculoskeletal system
- Your clinical findings
- Your interpretation of the significance of the presenting signs and symptoms
- Your differential diagnostic hypothesis and the conclusion you reached to explain the patient's presenting symptoms
- Whether the case was suitable for treatment
- Why you concluded that the case required referral to the Vet and how this would benefit the patient and your role in their ongoing care
- How you involved the owner in this decision
- The mechanism of the referral with accompanying evidence. For example: an anonymised copy of the referral letter; case record annotation of a telephone conversation, a copy of an e-mail or any other documentation
- The outcome of the referral and any ensuing modification of your treatment and management plan.

Recommended 1500-2000 words

Criteria fulfilled:

 B1-2

C1-5 inclusive
 D1-6 inclusive

E1-8 inclusive
 F1-4 inclusive

G1-6 inclusive
 H1-3 inclusive

**Describe your most recent case in which, after clinical evaluation, you concluded that the patient should be referred back to the Veterinary Surgeon:
(recommended 1500-2000 words)**

Stage 2 Recognition of Prior Experiential learning - Mapping document

| Standard | Verified work experience | Registration Assessors only |
|--|--|--|
| <p>(This is the standard you should show that you have met through your educational qualification and/your professional experience and/your life-long learning or CPD)</p> | <p>(Please reference any relevant work experience in the form below).</p> <p>Please ensure that you have clearly evidenced any cases you have included, with page and paragraph numbers.</p> | <p>(This column for is for Registration Assessors only.)</p> |

Mapping Document Table Layout and column requirements:

A: Health and Safety

| No. | Standard | Verified work experience | Registration Assessors only |
|------------|--|---------------------------------|------------------------------------|
| 1 | The practitioner must be able to demonstrate an understanding of the need to establish and maintain safe environments for practice that minimise risks to service users, those treating them and others, including the use of hazard and infection control | | |
| 2 | The practitioner must be able to demonstrate safe and effective positioning and handling | | |
| 3 | The practitioner must understand the need to maintain the safety of the animal in their care and be able to articulate and demonstrate awareness of the animal's safety and adapt or alter the environment to ensure compliance | | |
| 4 | The practitioner must be able to understand the need to maintain the safety of the owner/handler and be able to articulate and demonstrate awareness of the owner/handler's safety, adapting or altering the environment to ensure compliance | | |

| | | | |
|---|--|--|--|
| 5 | The practitioner must be able to select appropriate personal protective equipment and use it correctly | | |
| 6 | The practitioner must be aware of applicable health and safety legislation, and any relevant safety policies and procedures and act in accordance with these as pertinent to their profession | | |
| 7 | The practitioner must be able to work safely, including being able to select appropriate hazard control and risk management, reduction or elimination techniques in a safe manner and in accordance with health and safety legislation | | |
| 8 | The practitioner must be able to articulate and demonstrate awareness of appropriate hygiene procedures and undertake these within their remit of scope of practice | | |
| 9 | The practitioner must be able to articulate and demonstrate awareness of contagious diseases and their 'spread' and undertake the relevant procedures within the remit of their scope of practice to reduce the likelihood of this occurrence. | | |

B: Ethics in Animal Care

| No. | Standard | Verified work experience | Registration Assessors only |
|-----|---|--------------------------|-----------------------------|
| 1 | The practitioner must work in accordance with the Animal Welfare Act 2006 and within their scope of practice | | |
| 2 | The practitioner must have a working understanding of the Veterinary Surgeon's Act 1966 (2015 amendment) and act in accordance as is pertinent to their profession at all times | | |

C: Professional Communications

| No. | Standard | Verified work experience | Registration Assessors only |
|-----|--|--------------------------|-----------------------------|
| 1 | RAMP uses its knowledge of the industry to set various standards in professional communications to ensure that registrants recognise the roles of other professionals in animal care and is able to communicate and work professionally with them. | | |
| 2 | The practitioner must recognise the roles of other professionals in animal care and be able to communicate with them effectively, appropriately and professionally both verbally and non-verbally within the practitioner's scope of practice. | | |
| 3 | The practitioner must understand the theories of communication relevant to effective interaction with owners/riders and professionals and be able to undertake the following: | | |
| 3i | Professional communications with the vet | | |
| 3ii | Professional communications with the owner | | |

| | | | |
|------|---|--|--|
| 3iii | Professional communications with para professionals | | |
| 4 | All professional reporting must be fit for purpose and universally understood. | | |
| 5 | All communication must be treated with appropriate levels of confidentiality and (where relevant) in accordance with the Data Protection Act. | | |
| 6 | The practitioner must understand the role of professionals within their scope of practice and be able to undertake the following: | | |
| 6i | Be able to work appropriately with others | | |
| 6ii | Be able to work, where appropriate, in partnership with other professionals | | |

| | | | |
|------|---|--|--|
| 6iii | Understand the need to build and sustain professional relationships | | |
| 6iv | Understand the need to engage professionals and owners/riders in planning and evaluating diagnostics, and therapeutic interventions to meet their needs and goals | | |
| 6v | Understand the need to agree the goals, priorities and methods of musculoskeletal therapy intervention in partnership with the owner/rider/handler | | |
| 6vi | Understand the need to maintain high standards of personal and professional conduct | | |

D: Maintenance of records

| No. | Standard | Verified work experience | Registration Assessors only |
|-----|---|--------------------------|-----------------------------|
| | RAMP registrants must be able to maintain records appropriately in accordance with the criteria laid out below: | | |
| 1 | Be able to compile a suitable subjective and objective recorded case history relevant to the animal and discipline (completion of all patient notes should be fulfilled within 24 hours of the session to ensure clarity) | | |
| 2 | Be able to compile suitable treatment notes relevant to the animal and discipline (completion of all patient notes should be fulfilled within 24 hours of the session to ensure clarity) | | |
| 3 | Be able to keep accurate, comprehensive and comprehensible records in accordance with applicable legislation, protocols and guidelines | | |
| 4 | Recognise the need to manage records and all other information in accordance with applicable legislation, protocols and guidelines | | |

| | | | |
|---|--|--|--|
| 5 | Understand the need to agree the goals, priorities and methods of musculoskeletal therapy intervention in partnership with the owner/rider/handler | | |
| 6 | Understand the need to maintain high standards of personal and professional conduct | | |

E: Theoretical understanding

| No. | Standard | Verified work experience | Registration Assessors only |
|-----|---|--------------------------|-----------------------------|
| 1 | Understand and have a working knowledge of the structure and function of the relevant animal body, health, disease, disorder and dysfunction, relevant to their profession | | |
| 2 | Understand and have a working knowledge of the following aspects of biological science: normal animal anatomy and physiology, including the dynamic relationships of animal structure and function as related to the neuromuscular, musculoskeletal, cardio-vascular and respiratory systems as relevant within their scope of practice | | |
| 3 | Understand and have a working knowledge of how the application of musculo-skeletal treatment can cause physiological and structural change | | |
| 4 | Understand and have a working knowledge of the principles and application of measurement techniques based on biomechanics or physiology as relevant to their discipline | | |

| | | | |
|---|---|--|--|
| 5 | Understand and have a working knowledge of the principles and theories from physics, biomechanics, applied exercise science and ergonomics as relevant to the practitioner's scope of practice | | |
| 6 | Understand and have a working knowledge of physiological, structural, behavioural and functional changes that can result from musculoskeletal intervention and disease progression | | |
| 7 | Understand and have a working knowledge of pathological changes and related clinical features commonly encountered in animal musculoskeletal therapy practice | | |
| 8 | Understand and have a working knowledge of the theoretical basis of, and the variety of approaches to, assessment and intervention as relevant to the practitioner's scope of practice and from a professional perspective. | | |
| 9 | Understand both the need to keep skills and knowledge up to date and the importance of career-long learning | | |

Clinical understanding and competencies

F: Knowledge base for clinical practice

| No. | Standard | Verified work experience | Registration Assessors only |
|------------|---|---------------------------------|------------------------------------|
| 1 | Demonstrate understand the limits of the areas of knowledge that they are trained, qualified and insured to use | | |
| 2 | Are educated to a safe and competent standard within their area discipline | | |
| 3 | Are able to practise safely and effectively within their scope of practice | | |
| 4 | Know the limits of their practice and when to seek advice or refer to another professional | | |

G: Clinical reasoning for practice

| No. | Standard | Verified work experience | Registration Assessors only |
|-----|--|--------------------------|-----------------------------|
| 1 | Be able to evaluate the animal as appropriate to their scope of practice | | |
| 2 | Be able to complete a safe and effective assessment of the animal before them | | |
| 3 | Be able to assess and identify when the animal requires further veterinary intervention | | |
| 4 | Be capable of formulating a safe and effective hypothesis from which to create a suitable treatment plan | | |
| 5 | Be able to perform a safe effective treatment within the practitioner's scope of practice and knowledge base | | |
| 6 | Be able to articulate and demonstrate safe and effective post treatment after- care and exercise | | |

H: Professional autonomy

| No. | Standard | Verified work experience | Registration Assessors only |
|-----|--|--------------------------|-----------------------------|
| 1 | Be able to practise as an autonomous professional, exercising sound professional judgement | | |
| 2 | Be able to assess the nature and severity of the animal's problem and call upon the required knowledge and experience to deal with the animal's problem | | |
| 3 | Provide proof of veterinary consent to treat as appropriate within their scope of practice and in accordance with the Veterinary Surgeon's Act 1966 (2015 amendment) | | |

In the following box please indicate which documents you are sending and the number of pages in each that you have included within your application:
